

CNC Machinist / Programmer

Full time, Botany NSW

*360 Med Care is an innovative Australian company operating in the medical device, healthcare, and biotechnology sector specialising in total joint arthroplasty. **360 Instruments** is the manufacturing branch of our organisation, specialising in the design and manufacture of medical devices.*

At 360 Instruments, we are committed to improving the surgical experience and improving patient outcomes by providing the highest standard of instrumentation. We wish to enable surgeons and clinicians to focus on what matters most, the patient, and we believe our machining team is integral to delivering this. 360 Instruments is currently looking for experienced CNC Machinists / Programmers to join our manufacturing team.

Desirable skills and experience:

- Second year apprentice or above
- Experience in programming and operation of various CNC machinery including: milling, turning, EDM wire cutting
- CAD/Cam programming utilising MasterCam software
- Understanding of technical engineering dwg's and 3D CAD
- Laser Welding / Laser marking / Finishing and assembly
- Product inspection and production documentation

About you:

- Keen eye for detail, accuracy, and efficiency
- A passion for high quality work and precision
- A team player looking to collaborate, learn and share
- Great communication and documentation skills
- Desire to learn and strive for excellence on every job

About the role and working at 360:

- You will be working as a member of our small team based at the Botany manufacturing facility, where you will be reporting to senior management
- You will receive ongoing training and support to expand your existing skill set, knowledge.
- This opportunity comes with a competitive compensation package where you will be recognised for your work at each step of the way
- 360 Med Care is a large dynamic company where you will be interacting with, engineers, clinical specialists, surgeons and other interesting people
- You will have training resources available to introduce you to the wider 360MedCare organisation and have access its unique insights into digital Orthopaedic Planning and Analysis, and Computer Assisted Surgery.
- We have a great supportive team environment where staff strive to challenge and become the best versions of themselves
- Great social interactions and interesting and ground-breaking technological advancements
- Develop your skills in manufacturing within the medical device industry

Long and short term contracts (min 6mo) considered and a possibility for sponsorship for the right candidate.

If you feel you are up for a great challenge, please send your resume and cover letter to **hr@360med.care**
