

Software Project Manager

Full time, Pymble NSW

360 Med Care is an innovative Australian company operating in the medical device, health care, and biotechnology sector specialising in total joint arthroplasty. We are driven to optimise the episode of care through the combination of people, knowledge and technology.

In order to support our growing software team, we are in need of a Software Project Manager to manage and direct the various aspects of project execution. This includes leading scrums, controlling delivery, prioritisation and distribution of daily tasks, leading communication between stakeholders and teams and managing rapid iteration work.

Must have requirements:

- Background in software management / project management
- 3-5 years of professional experience
- Experience leading AGILE teams, including the use of Jira
- Demonstrated ability to deliver technical project management
- Ability to lead rapid prototyping

Nice to haves:

- Software development skills in a variety of languages
- Experience with Unity / .Net / C# highly regarded
- Previous experience in a heavily regulated environment, specifically medical devices, highly regarded

About you:

- Strong attention to detail
- Confident in your ability to lead and contribute to a team
- Passion for emerging technologies
- Dependable, self-motivated and takes ownership of work
- Logical, systematic and conscientious when approaching projects, tasks and problems

- Professional, clear and strong communication skills with an ability to address a variety of stakeholders
- Big picture thinker with an ability to prioritise and adapt based on current direction within an agile and fast-paced company

If you feel you are up for a great challenge, please send your resume and cover letter to **hr@360med.care**
